Annual Report 2024-2025

Walking Towards a Thousand-Year Vision

A Year of Transformation and Triumph

The academic year 2024–25 marked a defining chapter at AGVS. What began with a two-month crash course evolved into a year of deep implementation of our Interest-Based Education (IBE) system.

Every step of our journey was supported by generous contributions from CSR partners, individual donors, and well-wishers. We thank each one of you for standing with us.

To help build trust and transparency, we opened our doors monthly to visitors from Nagpur on tournament days. These visits offered firsthand insight into the energy and effectiveness of our educational approach.

We are proud to report 100% results for the fourth consecutive year in the Maharashtra SSC Board Exams. Students scored between 65% and 91%.

Marks are a milestone — not the measure.

Our focus is on what matters most — who our children are becoming.

Student Growth Beyond Marks

In our IBE model, students choose learning paths aligned with their interests. This year, their accomplishments were both inspiring and practical:

- **Entrepreneurship:** Two 9th-grade students launched a mushroom farming venture. Others experimented with peanut katli, matri, and healthy snacks.
- **Arts and Music:** Students made Mandala art, caricatures, designed sports jerseys, and composed theme songs.
- **Food & Cooking Module:** Students prepared nutritious wraps, summer drinks, and served 50+ guests while learning estimation and planning.
- **Kho-Kho and Kabaddi:** Teams built stamina, learnt game strategies, and took on real-life roles such as journalist, reporter, physio, medic, and commentator in three languages. They also experienced captaincy and learnt to be supportive audiences.
- **Self & Society Module:** Students engaged in reflection, created IDPs, performed skits, and contributed to The Growth Lab.

Educators as Learners

Our teachers — the Acharyas — walked the path of learners too. They used AI tools to generate stories from real-time module data and supported student growth with consistency and creativity.

A key innovation this year was the introduction of the Karma Points and Bank Accounts system — a functional student economy built within the school. Students earned and tracked points based on their behaviour, consistent effort, learning outcomes, and physical fitness. Character and contribution were valued just as much as academic progress.

The currency they earned could be used to invest in their interests — whether to access facilities, participate in modules, or unlock new learning opportunities. This system helped students understand the value of their actions and encouraged ownership of their learning journey.

The AGVS Difference: Beyond Traditional Education

Our unique systems continue to yield remarkable results:

- ◆ Students proactively seek additional worksheets and learning opportunities
- ◆ Children understand the value of effort and earning their privileges
- ◆ Fear of examinations has been replaced by enthusiasm for continuous learning
- ◆ Our monthly tournament days have become showcases of joy and energy, attracting visitors from Nagpur who witness the pure enthusiasm of learning in action

Energy and Joy: The True Measures of Success

The most rewarding aspect of this year has been witnessing children who previously struggled with traditional teaching methods now finding genuine joy in learning. The risen energy levels across our campus are palpable – a testament to the power of Interest-Based Learning. When learning becomes relevant, engaging, and connected to real life, children don't just succeed; they thrive.

Our Commitment to the Vision

We remain steadfast in our mission to create self-learners and doers – independent thinkers who are spiritually balanced, analytically sharp, and capable of meaningful contribution to society. Every achievement this year brings us closer to our ultimate vision: making the school obsolete by creating individuals who can learn, adapt, and excel independently.

Gratitude and Partnership

None of this would be possible without your generous support. Whether you are a corporate CSR partner, an individual donor, or a well-wisher who visits our campus, you are integral to this transformation. Your belief in our vision enables us to continue this generational work of preparing children not just for examinations, but for life itself.

We invite you to continue this journey with us. Visit our campus, witness the energy, observe the learning, and see for yourself how your support is creating tomorrow's leaders. Together, we are not just running a school; we are cultivating the future of Bharat.

With deep appreciation and unwavering commitment to our shared vision,

The AGVS Team

"Education is not just about marks. It is about building strength of character, clarity of thought, and readiness for life. These results matter — but they are not the full story. What truly matters is who our children are becoming."

Support Our Mission: World-Class Education for All

We are not just any school. We are a school with a purpose — providing world-class education to children beyond the elite circles, nurturing tomorrow's leaders from rural communities, and proving that excellence knows no geographical boundaries.

Your contribution, no matter the size, becomes a building block in our thousand-year vision. Every rupee invested in AGVS multiplies into countless opportunities for children who would otherwise be limited by circumstances.

Join our mission. Support our vision. Transform lives.
